

Historical & Projected Financials

Orama Network & RootWallet · Startup Qatar Investment Program, START track · 5 October 2026

All amounts in US dollars. Projections are a planning case, not a forecast.

1. Historical financials (January 2025 – September 2026)

Item	Amount
Revenue	\$0
External funding (equity, debt, grants, token sales)	\$0
Salaries paid by the project	\$0
Debt	\$0

- No legal entity exists yet. The company will be incorporated in Qatar on funding.
- Development was self-funded by the two founders from their own contract income. Neither founder has drawn a salary from the project.
- What exists today: Orama Network (running on devnet and testnet, hosting a third-party production app), the ORAMA layer-one blockchain (running on stagenet), and RootWallet for macOS, Linux, iOS, Android and the command line (in internal testing). About 3,050 commits across the two main repositories.

2. The ask and use of funds

\$1.1M in equity, covering 18 months: launch both products, set up the company in Doha, and grow the team from 2 to 6.

Item	Amount
Two founders, full-time in Doha	\$400,000
Cryptography and security engineers	\$215,000
UX/UI designer and sales lead	\$90,000
Independent audit of RootWallet	\$90,000
Orama One prototype and first batch	\$90,000
Servers, hardware and infrastructure	\$50,000
Qatar company, legal and accounting	\$40,000
Travel and networking	\$35,000
Relocation to Qatar	\$25,000
Contingency	\$65,000
Total	\$1,100,000

3. Key assumptions (base case)

Assumption	Value
Revenue starts	Month 3 after funding
Monthly active wallet users	50,000 at month 18; 250,000 at month 36
Paid subscription conversion and blended price	3% at \$6/month
Swap volume per user and fee	\$600/year at 0.85%
On-ramp purchases per user and revenue share	\$100/year at 0.5%, from month 6
Orama One units and price	300 (months 12–24), 1,500 (year 3); \$999 at 30% margin
Compute marketplace	From month 18; 1,000 teams at \$80/month by month 36; 10% take
Software gross margin	About 88–90%
Year 3 operating costs	About \$700,000 (team of six in Doha plus overheads)

Benchmarks: Phantom charges 0.85% per swap and MetaMask 0.875%. 1Password charges \$3.99 a month and Bitwarden \$19.80 a year. The base case puts 250,000 users at month 36, about one sixth of Exodus today.

4. Three-year projection (base case)

	Year 1	Year 2	Year 3
Monthly wallet users (year end)	30,200	116,667	250,000
Orama One units shipped	23	277	1,500
RootWallet subscriptions	\$28,000	\$141,000	\$408,000
RootWallet swap fees	\$65,000	\$333,000	\$963,000
RootWallet on-ramp share	\$6,000	\$33,000	\$94,000
Orama One hardware	\$23,000	\$277,000	\$1,498,000
Orama compute marketplace	\$0	\$9,000	\$67,000
Total revenue	\$122,000	\$793,000	\$3,031,000
Cost of revenue	\$27,000	\$251,000	\$1,218,000
Gross profit	\$95,000	\$541,000	\$1,813,000
Team (2 founders + 4 hires)	\$457,000	\$483,000	\$470,000
Audits and Orama One prototype	\$150,000	\$60,000	\$60,000
Servers, company, legal, travel, marketing, relocation	\$116,000	\$119,000	\$170,000
Total operating costs	\$723,000	\$662,000	\$700,000
Operating result (EBITDA)	-\$629,000	-\$120,000	\$1,113,000
Cash at year end (from \$1.1M)	\$471,000	\$351,000	\$1,464,000

- Software revenue run rate at month 18: about \$388,000 a year. Total run rate at month 36: about \$3.5M a year.
- Monthly operating cash flow turns positive in month 22. Cash bottoms out at about \$317,000 in month 21, so the \$1.1M covers the plan without a further round in the base case.
- Orama One batches are funded by refundable pre-orders, so hardware does not draw on the \$1.1M beyond the prototype.

5. Scenarios at month 36

	Conservative	Base	Upside
Monthly wallet users	50,000	250,000	1,000,000
Annual revenue run rate	~\$0.5M	~\$3.5M	~\$19.5M
Blended gross margin	~55%	~65%	~71%
Funding outcome	\$1.1M lasts about 19 months; next round needed	Self-sustaining from month 22	Self-sustaining from month 8

6. Sensitivity and exclusions

- The plan depends most on wallet users and swap volume. Swaps are about two thirds of base-case wallet revenue.
- With 50% fewer users, base-case revenue at month 36 falls to about \$2.6M. With no hardware at all, it is about \$2.0M at a gross margin above 85%.
- Not included: rewards the company earns by running network nodes, staking commission, enterprise support contracts, QDB R&D and innovation grants, and any value of the ORAMA token.
